GlobalCollect provides **outsourcing** of the complete worldwide payment collection process.

**Why are global online merchants choosing GlobalCollect?** GlobalCollect is the only payment partner that provides a single web enabled technical and administrative **interface** for true global payment methods and services.

**Can't everyone in the world just pay with a Credit Card?** Payment cultures vary greatly across different regions. Most notably, credit card use in Europe and Asia is much lower than in North America. Alternative payment methods such as **direct debits, bank transfers** or **checks** can represent up to **80%** of the online payment transactions in France, Germany, Spain and many other countries. Missing out on global business opportunities can be avoided if you offer your customers the ability to pay with the most popular **local payment methods** in **local currencies**. GlobalCollect is your preferred partner to manage a very extensive global banking and acquiring network on your behalf. You will distinctly benefit from our large network of bank relationships as well as our many years of experience in payments. With us, your company can accept over **100 payment methods** and **158 local currencies** worldwide. In a matter of days, you will reach a much larger audience, allowing you to gain global customers trust and business. All of this with no heavy administrative work.

**What about collection risks?** We provide fraud screening services and exchange rate insurances to secure your sales. Reconciliation and detailed reporting on your transactions will enable your company to simplify the administration of your reconciled payments and remain in control of your worldwide payment collection 24 hours a day & 7 days a week.

**Credit / debit cards** remain the payment method mostly used online. GlobalCollect processes Visa and MasterCard in 158 currencies, American Express in 79 currencies, Diners in 16 currencies and JCB in 20 currencies. In addition to international cards, GlobalCollect processes the following local cards: Maestro (UK), Solo (UK), Laser (Ireland), Carte Bleue (France), Dankort (Denmark), Discover (US), 4B (Spain), CartaSi (Italy) and over 40 local Chinese debit cards.

**Direct debits** are very popular online in countries where non pre-authorized direct debit transactions can be made: Germany, The Netherlands, Austria and Spain. In France, the United Kingdom, Italy, Belgium and Switzerland, this type of payment is popular for recurring payments such as subscriptions. Direct debits are cheaper than credit cards for higher value transactions since they are charged on a per transaction basis rather than a percentage of the amount of the transaction.

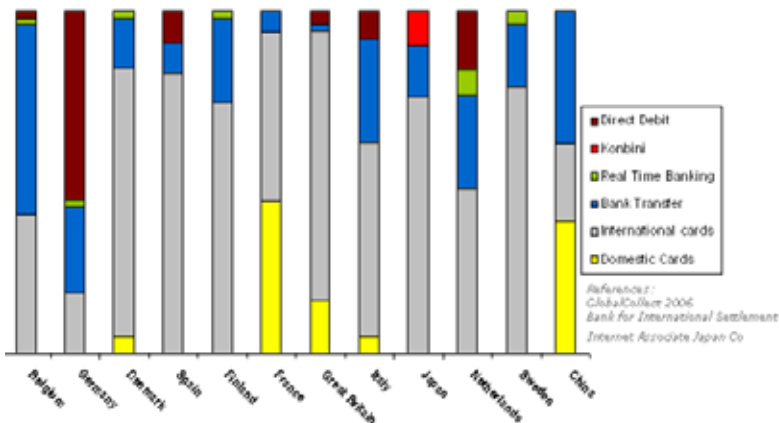

**Bank / wire transfers** are a very convenient payment method because this type of payment is guaranteed. Payments cannot be reversed by consumers. GlobalCollect offers merchants the possibility to accept local bank transfer payments in over 50 countries without establishing a local presence or opening local bank accounts.
